

PRESS RELEASE

CX-II seed coulters

24. 02. 2013 Soest, Germany

Kverneland Accord, the specialists for seeding technology within the Kverneland Group, will launch a new seed coulters range named CX-II. The CX-II seed coulters are designed to work on the cultivator mounted seed drill range and is available in working widths from 3 to 6m. The range of machines includes the Kverneland models mc-drill PRO, s-drill / s-drill PRO, i-drill PRO, DF 1 and DF 2.

The CX-II coulters offers high seed placement accuracy. A flat steel disc opens the soil and the well-known flexible cleaning disc system ensures the disc is kept clean in one step without the need for additional scrapers. A radically new designed coulters body, manufactured from cast iron allows a coulters spacing of 12.5cm. As standard the rear mounted press wheel offers intelligent adjustment possibilities, ensures the depth control and creates an optimal seed to soil contact.

User friendliness has been one of the key words used during development; therefore the CX-II coulters is 100% maintenance free.

Kverneland Group is a leading international company developing, producing and distributing agricultural machinery and services. Strong focus on innovation allows us to provide a unique and broad product range with high quality. Kverneland Group offers an extensive package aimed at the professional farming community, covering the areas of soil preparation, seeding, forage and bale equipment, spreading, spraying and electronic solutions for agricultural tractors and machinery.
