

PRESS RELEASE

Vicon Alpex Loader Wagons

19.10.2010, Gottmadingen, Germany

Alpex 220

By adding new features Vicon has started the generation change going from the -TL series to the new Alpex series on its low loader wagon range. In this relation the two models Alpex 220 and Alpex 280 has been given a new design.

Alpex Loader Wagons – New features

The new Alpex loader wagons are still equipped with the wear less arm controlled three or four feeder comb loading units. Additionally technical details have been updated to improve the overall usability of the machines as low loader wagons.

- The Alpex 220 and Alpex 280 will be equipped with a foldable front wall instead of the former net solution.
- An additional net over the tailgate covers the back of the low loader wagon and ensures safe transport of the load.
- Hydraulically foldable superstructure is available on both models, to ensure comfortable operation in situations with restricted height.
- Strengthening of the silage cutting unit ensures sustainability.
